## Key Findings

More women (68\%) than men (62\%) received a pay rise this year, a reversal from 2020.

Almost 40\% of those looking for jobs received more than one offer.

More than $75 \%$ of businesses have a remote working policy in place, whilst 15\% of respondents are working for companies with no such policy.

For more than two-thirds of businesses, COVID-19 did not impact employee engagement or productivity.

Australia owned companies are more likely to hire more employees
(42\%) up from last year's $30 \%$. International companies are also looking to hire more employees (33\%) up from last year's $26 \%$.

## Foreword

As we move into the next phase of the global pandemic and offices reopen it comes as no surprise that the majority of Life Science companies have reconfigured work to fit the 'new normal' by prioritising flexible working arrangements, focusing more on mental health \&t wellbeing, and providing better work-life balance to their employees. This creates a level playing field for those employers embracing the new normal, which is critical for talent retention and attraction. But employers who want to revert to the pre-COVID working conditions are bound to face many hurdles.

You have undoubtedly heard about the global wave of resignations, which is expected to peak in 2022. If a wave of resignations were to occur in the Life Sciences sector, it would be a cause for concern because it could be a signal that staff are looking to leave the field altogether - as generally speaking, the Life Sciences sector compensates and cares for its people extremely well, which is also demonstrated by the continued high engagement scores reported in our annual surveys.

As far as the Life Sciences industry is concerned, I predict we are also likely to see a wave of holidays in the first half of 2022, owing to the fact that international travel has been restricted since the beginning of the COVID-19 pandemic. Many experts are predicting we may also lose highly skilled overseas-born residents who decide to return to their native country permanently. A wave of holidays or resignations, combined with the past two-year suspension of skilled migrant intakes, plus a possible reverse immigration will put a significant strain on existing labour resources.

In the past 6 months, managers reported hiring new talent had been more difficult than usual. This correlates with the survey contributors reporting that they received multiple job offers when job hunting. Given these facts and predictions, I anticipate the war for talent will far exceed anything I have seen in my 30 years in Recruitment. My recommendation to managers is to do whatever it takes to retain their current top talent. If you need to recruit, go to the market with a clear employee value proposition, have an open mindset on transferrable skills, and work to a faster recruitment timetable.

In spite of all these challenges posed by the COVID-19 pandemic, the Australian Life Sciences sector has recovered remarkably well and shows major growth potential in the coming years. The majority of our contributors reported that the pandemic did not impact the level of engagement or productivity in their organisation, while there was also a rise in the number of managers who are looking to increase their headcount in the next 6 months.

We hope this year's report provides you with valuable insights into the Australian Life Sciences sector, including salary and job satisfaction statistics and market trends to prepare for new opportunities and challenges ahead.

Thank you to everyone who has contributed to our surveys over the years. You have helped us continue to produce one of the longest-running salary \&t job satisfaction reports in Australia. If you would like to know more, please get in touch with my team on 029431 2555, or myself on 0294312522.

Catherine O'Mahony | Director On Q Recruitment Pty Ltd
Ph: +61 294312522

What's New in 2021?
In this year's survey, we asked our traditional set of job satisfaction questions and expanded on last year's COVID-19 queries. We hoped this would give us a good idea of how companies have weathered the pandemic storm, and what their employees think about the 'new normal'.

In terms of job satisfaction, the number of respondents who said they are unsatisfied with their current job rose from $6 \%$ last year to $15 \%$ this year. However, the majority (53\%) reported that they are still satisfied with their current role, a slight dip since last year's $56 \%$.

On a positive note, growth is back. Most managers think they'll increase their headcount in the coming year with $37 \%$ of businesses planning on increasing their permanent headcount in the next 12 months (28\% in 2020).

What we're seeing in this report is a steady-as-she-goes type of result. Much of what we saw develop in our 2020 survey remained the same, with most negative results balanced out by a swath of positivity. Given the context, Australian Life Sciences workers should be immensely proud of these results - not even a global pandemic could keep us down.

## Remarks

## Number of contributors: 1,028

n : number of observations recorded for each category.

## Sector Analysis:

Total Remuneration: includes base salary, superannuation, car/car allowance and any other benefits, but excludes bonus and commission.

## Summary of Total Remuneration by Job Title:

 a summary of the total salary package for each job title.Bonus by Job Title: the average reported bonus by contributors.

Median: the middle result when all data is ordered from lowest to highest.

## Calculations:

- The data has been presented 1st Quartile, Median and 3rd Quartile, using Microsoft Excel Quartile.exc formula.
- In instances where there are three or less data points, only the median has been shown.

## Summary of Total Remuneration by Industry:

a summary of the total salary package by individual industry sector, for each job title

## Survey opened on 8 June 2021

$50 \%$ responded before NSW went into lockdown on 26 June 2021.

Pharmaceuticals - OTC \&t Consumer Healthcare

## Functional Sectors:

Clinical Research
Commercial, Sales and Marketing
Executive General Business
Management (CEO, Managing Director,
CSO, VP, etc)
Health Economics/Market Access
Human Resources
Laboratory
(QC, R\&tD, Product Development, etc)
Medical Affairs
Operations \&t Manufacturing
(Production, Process, Supply Chain, Systems, etc)

Quality Assurance
Regulatory Affairs

## Key Areas of Interest - Analysis

## Demographics

The following analysis has been collated from 1,028 completed surveys within Australia. Like last year, the majority of our respondents are in permanent full-time roles ( $81 \%$ ). Permanent part timers make up $8 \%$, followed by independent contractors ( $6 \%$ ) and casual workers ( $5 \%$ ),

## Respondent Breakdown by Company Size

Under 50 employees 20\%$51-100$ employees $13 \%$
101-250 employees 17\%

251-500 employees 19\% - 501-1,000 employees 13\% - 1,001+ employees 18\%

Gender Split

The Owner of My Company Is:

## Remunerations

## Salary/Remuneration Pay Increases in the Last 12 Months

The number of respondents who were eligible for a pay increase*, and received one, has remained steady since 2020 at 64\% (down from 77\% in 2019). But, in a reversal from last year, more women than men received a pay rise in the past 12 ( $68 \% \mathrm{vs} .62 \%$ ).
*We define eligible as having been employed by the company for more than 12 months.

## Percentage of Respondents Receiving a Pay Increase

## Actual Percentage of Pay Increase

Top Reasons Respondents Did Not Receive a Pay Increase*

All pay rises are on hold or frozen due to COVID-19 pandemic

Received no feedback

Inadequate company performance
*Excluding those who had been with a company less than 12 months

$53 \%$ of respondents
received a pay increase when they changed job (47\% did not).

## Bonuses and Sign-on Bonuses

More respondents received a bonus this year than last, at 59\% versus 2020's 54\%. In another sign of competition for talent, sign-on bonuses were also up on last year's figure, at $9 \%$ versus $7 \%$ in 2020, with $\$ 10,000$ being the most common amount. Most companies didn't offer an employee loyalty bonus, and of those that did, most offered $\$ 5,000$ or less. Overall, international companies were more likely to offer sign-on bonuses, with $12 \%$ offering one compared to 5\% of Australian companies.

Received a Bonus in the Past 12 Months

Offered a Sign-On Bonus to Change Roles

Company Offers a Loyalty Bonus to Keep Employees

## Non-Cash Benefits

As data for this year's report was collected during the pandemic while some states were in lockdown it is no surprise that working from home (WFH) grew from $61 \%$ last year to $81 \%$ this year. WFH and flexible working hours are the top non-cash benefits received and most valued by employees this year. It will be interesting to see if businesses will continue providing flexible working arrangements to most or all of their employees as offices start to reopen.

## Top 5 Most Common Benefits Received

\# Work from home $\mathbf{8 1 \%}$
(1) Flexible working hours 77\%

Time off in lieu 42\%
(
Salary sacrifice (eg. Travel, car, other benefits etc) 29\%

(1)

Compressed working hours/RDO 31\%

The Employee Experience

## Superannuation

Effective 1 July, 2021, the Superannuation Guarantee increased from 9.5\% to 10\%. Most respondents indicated their employer is passing on the increase (54\%). It's interesting, though, that so many ( $41 \%$ ) weren't sure what their employer's policy is - representing a potential lack of communication about the subject.

Is your employer passing on the $0.5 \%$ increase in the Superannuation Guarantee?

- Yes - current take home pay will not be affected (overall salary package will increase) 54\%
- No - current take home pay will be reduced (overall salary package will remain the same) 5\%

Unsure 41\%

## Job Satisfaction

Job satisfaction took a slight dip since 2020, with the number of respondents saying they are satisfied dropping from $56 \%$ to $53 \%$. Those who are very unsatisfied with their job rose from $6 \%$ to $15 \%$ this year. This represents the second year in a row that disatisfaction has increased, albeit by small margins. Women indicated that they were more satisfied with their job than men, but more men reported that they feel secure about their current job than women.

Job Satisfaction Rates

## Change in Feelings of Job

 Security, Past 12 Months

Breakdown of Men vs. Women

Reasons for Leaving Previous Employer

Improved salary and benefits 49\%

Lack of job satisfaction/seek a more interesting role 31\%

Reasons for Staying With Current Employer

Flexibility in the workplace (e.g. work hours, part time or working from home) 46\%

Supportive management/ relationship with line manager 35\%

Opportunity for career advancement/promotion 28\%

## Comments and Suggestions from Employees About Reducing Work Related Stress

## $f$

Increased headcount to reduce individual workload.

My employer follows up regularly to ensure they can alleviate work stress where possible and to give support where needed.

Transparency about future operational changes.

Increase headcount so I can focus on managing and leadership more. My current lean team is highly efficient but stretched.

Open communication, mentoring, having realistic expectations and reducing system related issues.

Hire new staff when employees resign.

Be more appreciative of our efforts and provide awards or incentives.

Hiring Talent

## Looking for New Work

Most employees (45\%) don't think they'll change jobs within the next 12 months, but $38 \%$ have already sought new work or attended interviews within the last 12 months. Men were more likely to have applied for new work in the past year than women, at a rate of $42 \%$ versus $36 \%$.

Thinking of Changing Jobs in Next 12 Months

## Applied for a New Job

 in Past 12 Months

## Received More Than

a New Position

## What are Managers Telling Us?

Most employers seem intent on winning the war for talent and onboarding new staff. Thirty-seven percent of businesses are planning to increase staff headcount within 12 months, up nearly 10 points on last year. Fourty-two percent of Australian owned organisations ( $30 \%$ in 2020) and $33 \%$ of internationally owned organisations ( $26 \%$ in 2020) are planning to increase their permanent staff headcount this year.

## Employer Plans for Headcount in the Coming 12 Months

| Increase the permanent headcount in my <br> team | $37 \%$ |
| :--- | :---: |
| No change to headcount in my team | $36 \%$ |
| Increase casuals or contractors headcount <br> in my team | $12 \%$ |
| I am uncertain due to COVID-19 | $10 \%$ |
| Decrease the permanent headcount in my <br> team | $4 \%$ |
| Decrease casuals or contractors headcount <br> in my team | $1 \%$ |

## Top Reasons for Turnover

| Employment <br> terminated | $5 \%$ | $3 \%$ | $7 \%$ |  |  |  |
| Extended leave of <br> dosence | $5 \%$ | $7 \%$ | $3 \%$ |  |  |  |

## Comments and Insights from Managers About the Past Six Months

ff More options are vavilbble for prospective employecs, so vou need to work harder to attract talent:

The industry has become so competitive with other CROs offering higher salaries and a bonus scheme so it was difficult to retain good talent. There have also been limited opportunities for career progression.

I found that my team was more productive, felt empowered and were very appreciative to have a job and to be able to work from home.

As most have been working remotely, it has been an opportunity to become better connected with direct reports and peers. We have learnt more about each other from a personal perspective.

People's morale has fluctuated and therefore I spend a lot more time with my team individually to ensure their wellbeing. More issues are being escalated due to remote monitoring of clinical trials.

Adapting and allowing employees flexibility is key to maintaining team harmony and productivity.

We have asked our people to do more, under trying conditions, as we have had a hiring freeze in place to mitigate impact to business financials resulting from COVID.

## Comments and Insights from Managers About the Next Six Months

## $G f$

Managing employee mental health and wellbeing will be more of a challenge as we navigate through COVID.

Quality businesses will be able to recruit good talent. The battle for experience will increase significantly.

Uncertainty prevails so company priorities are shorter term.

With experience in handling COVID situations and lockdown, the team is already getting better at handling the challenges.

The need to grow staff numbers is increasing while finding experienced staff gets harder.

Companies taking an inflexible approach to remote working will be less competitive in attracting and retaining talent.

Unless there is a big lockdown or a financial collapse we are primed for major growth, which I expect to occur.

Recruitment

Almost 70\% of businesses have tried to recruit in the past 6 months. For $40 \%$ of those companies, this process took six to ten weeks and most candidates ( $61 \%$ ) accepted the offer.

Top Reasons Candidates Declined a Job Offer

Average Time to Fill Job Vacancies

- The majority of managers said that attracting new talent has been more difficult than usual in the past six months.
- The majority of managers also predicted in the next six months, that the difficulty of attracting new talent will be the same as in the past six months.
- Many credible sources have predicted that there would be a global wave of resignations, which is likely to peak in 2022.
- We predict that the Life Sciences sector is also likely to see a wave of holidays in the first half of 2022, owing to the fact that international travel has been restricted since the beginning of the COVID-19 pandemic.
- Australia may also experience reverse immigration of highly skilled overseas-born residents.
- Due to these factors, attracting and retaining top talent in the Life Sciences sector will become much more difficult in the next 12 months.

In the Past Six Months...

| Attracting new talent was |  |
| :--- | :---: |
| Easier | $11 \%$ |
| Same or no change | $36 \%$ |
| More difficult | $53 \%$ |
| Retaining talent became |  |
| Easier | $14 \%$ |
| Same or no change | $54 \%$ |
| More difficult | $32 \%$ |

| Same or no change | $37 \%$ |
| More difficult | $51 \%$ |

In the Next Six Months...
Attracting new talent will become

| Easier | $15 \%$ |
| :--- | :---: |
| Same or no change | $47 \%$ |
| More difficult | $38 \%$ |

Retaining talent will become

| Easier | $9 \%$ |
| :--- | :---: |
| Same or no change | $53 \%$ |
| More difficult | $38 \%$ |

Obłaining permanent headcount approval will become

| Easier | $10 \%$ |
| :--- | :---: |
| Same or no change | $52 \%$ |
| More difficult | $38 \%$ |

When asked, $77 \%$ of respondents said their employers have a working from home (WFH) policy, and $81 \%$ said they are permitted to work remotely. Fifteen percent of employees are working for companies with no formal WFH policy and $8 \%$ were unsure about their company policy.

| Current Employee WFH Arrangements |  |
| :--- | :---: |
| N/A I work from home 100\% | $20 \%$ |
| It ranges from 1-5 days per week | $37 \%$ |
| 1 day per week | $5 \%$ |
| 2 days per week | $7 \%$ |
| 3 days per week | $3 \%$ |
| 4 days per week | $21 \%$ |
| Every day |  |

Who Decides Working From Home Arrangements

## Views and Preferences

Most employees enjoy working from home, but would prefer to split time between home and the office. Only 19\% said they'd prefer to work remotely all the time. For managers, $29 \%$ would prefer to offer working from home on a case by case basis, with just $4 \%$ wanting staff to be in-office all week.

## Employee Preferences Regarding Working Remotely

Manager Preferences Regarding Working Remotely

I would prefer for my staff to be in the office $100 \%$ of the time $4 \%$

- I would prefer for my staff to be in the office at least $80 \%$ of the time $11 \%$
$\square$ I would prefer for my staff to be in the office at least $60 \%$ of the time $16 \%$
- I would prefer for my staff to be in the office at least $40 \%$ of the time $14 \%$
$\square$ I would prefer for my staff to be in the office at least 20\% of the time 5\%
- I would prefer to decide on a case-by-case basis for each individual staff member 29\%
$\square$ I have no preference and my staff can choose how often they come to the office 19\%
Other 2\%

## Hiring Remote-Only Workers

Last year we found that $70 \%$ of managers would consider hiring remote-based employees (or already had done so). This year, we asked if their opinion had changed. $61 \%$ said they would now hire remote-only workers (or already do so), plus an additional $6 \%$ manage teams which don't work in an office at all. Internationally owned companies were more likely to be flexible about remote working than Australian owned companies.

[^0]Living with COVID-19
COVID-19 has impacted both employers and their employees in significant and varied ways. Here, we have collected a variety of our pandemic-related questions and answers to build a more holistic picture of how COVID-19 has affected the country.

How the Covid-19 Pandemic Effected Job Salisfaction

$39 \%$ of employees told us their pay rises are on hold.

10\% of managers aren't sure if they will increase headcount.

Productivity \& Engagement
For most companies, staff engagement has remained the same despite the pandemic (67\%), and the same goes for productivity (64\%). Internationally owned companies had higher levels of productivity, while Australian companies had higher levels of engagement.

Team Productivity Since COVID-19 Has:

## Border Closures and Vaccines

At the time of the survey, Managers told us they don't believe Australia's pandemic-related border closures have impacted their ability to recruit the right talent, with $63 \%$ saying no and $18 \%$ saying yes. As for the vaccine roll-out, just over half ( $55 \%$ ) said their company does not have a vaccine policy, with one third saying yes and the remaining $11 \%$ unsure if they did or not.

Border Closures Impacting Recruitment

Company Has a Vaccine Policy

Wellbeing at Work
Stress
Feelings of stress at work are almost identical to last year's results. The majority of respondents feel either moderately (43\%) or occasionally ( $41 \%$ ) stressed, the same as 2020. Employee stress was slightly higher in international businesses compared to Australian owned businesses.

Feelings of Stress at Work

Top Comments from Respondents... How to Bring Workplace Stress Down
"Hire more staff to meet work demand."
"Provide support resources."
"Recognise and reward competent, active and hard working staff."

## Sharing Concerns of Wellbeing at Work

Once again, we found that overall women were more likely to be uncomfortable or very uncomfortable approaching their HR representative or direct line manager with problems at work - such as stress, feeling unsafe, or concerns for mental wellbeing.

## Workload and Related Stress

If You Felt Concerned For Your Mental Wellbeing

Feeling Unsafe At Work
